Target version:	3.1.1		

Description

If the option is selected aliases' characters should be converted into URL instances, like this:

<http://ru.wiktionary.org/wiki/%D0%BA%D0%BE%D0%BD%D1%82%D0%B5%D0%BD%D1%82>

Otherwise accented and non-Latin characters in a URL should be converted to Latin equivalents if possible (à to a, ? to z, etc.)
