#### Description

It looks like pages are not deleted in menus when you delete a page itself.

1. Create a new page
2. Add it to the main menu
3. Delete a page

Clear cache - no result so far. It's still in the menu.

Extra steps:

1. Create page - demo
2. Create plugin that adds extra page - demo
3. Delete page demo / Install plugin

You can see the page in the menu.
