

Subrion Opensource CMS - Bug #2188

Sitemap URLs generated incorrectly when 2 languages exist and languages selection is disabled

July 07, 2015 15:44 - Batyr Mackenov

Status:	New	Start date:	July 07, 2015
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Core	Estimated time:	0.00 hour
Target version:	4.3.0		
Description			
Despite of inactivity of the second language, URLs for sitemap generated including language prefix.			
For example, if you have only one active language, you anyway get URLs like below:			
<pre>/de/blog/ /de/login/ /de/profile/ /de/search/</pre>			

History

This should be discussed. Probably if we change this we will have issues with redirection later, when we translate a language but the URLs become indexed without language prefix. This might be the cause of SEO problems.

one of the ways to solving this trouble (v 4.0.5):

`includes\classes\ia.admin.sitemap.php`

row 196

change:

```
if (empty($url))
```

to:

```
if (empty($url) && $page['name'] !== $homePageName)
```

rows 207-215 to:

```
$rez = '';  
$currentLanguage = $this->iaView->language;  
foreach ($this->iaCore->languages as $code => $title) {  
    if ($code != $currentLanguage) {  
        // potentially buggy. replaces all (!) of entries in URL  
        $rez .= str_replace(IA_URL_DELIMITER . $currentLanguage . IA_URL_DELIMITER, IA_URL_DELIMITER . $code .  
IA_URL_DELIMITER, $result);  
    }  
}  
$result = $result . $rez;
```
