| Description | | | |
| <p>By default there are Home, Login and Register pages in the Inventory menu. If I want to have only Login and Register pages in the Inventory menu, I remove Home page (from the menu) and Inventory menu becomes inactive due to the fact that Login and Register pages are not parsed as pages.</p> <p>Please make it possible to have only Login and Register pages in the Inventory menu.</p> | | | |

This is totally up to template designer now.
Use layout.tpl or render-menu.tpl to show login/registration links properly.
