

Auto Classified Script - Bug #2258

Strange code block for handling ajax requests in view.php

October 28, 2015 07:08 - Batyr Mackenov

Status:	Closed	Start date:	October 28, 2015
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	4.0.0	Spent time:	0.00 hour
Description			
<pre>if (iaView::REQUEST_JSON == \$iaView->getRequestType()) { \$output = array('error' => true, 'message' => iaLanguage::get('invalid_parameters')); switch (\$_POST['action']) { case 'callback': if (\$listingId = (int)end(\$iaCore->requestPath)) { \$listing = \$iaAuto->getById(\$listingId); } break; } \$iaView->assign(\$output); } }</pre>			
It seems this code block does nothing.			
Check for references and remove if there aren't.			

History

#1 - October 29, 2015 03:38 - Vasily Bezruchkin

- Status changed from New to Closed

- % Done changed from 0 to 100

I was going to implement an enquiry functionality through it. Removed.

#2 - October 29, 2015 03:44 - Vasily Bezruchkin

- Target version changed from 4.0.2 to 4.0.0
