

Web Directory - Bug #2279

Code that checks for duplicated domain is incomplete

November 12, 2015 03:50 - Batyr Mackenov

Status:	Closed	Start date:	November 12, 2015
Priority:	Normal	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	4.0.1		
Description			
Here is he code for checking duplicate domain names, but related configuration options don't exist.			
<pre>if (iaCore::ACTION_ADD == \$pageAction && \$iaCore->get('duplicate_checking')) { \$check = \$iaCore->get('duplicate_type') == 'domain' ? \$item['domain'] : \$item['url ']; \$status = \$iaListing->checkDuplicateListings(\$check, \$iaCore->get('duplicate_type')); if (\$status == 'banned') { \$error = true; \$messages[] = iaLanguage::get('error_banned'); } elseif (\$status) { \$error = true; \$messages[] = iaLanguage::get('error_listing_present'); } } }</pre>			
This code block doesn't work as <i>duplicate_checking</i> and <i>duplicate_type</i> params don't exist.
