

Subrion Opensource CMS - Bug #232

Page preview should be opened with currently editing language

Target version: 2.3.7	
Description Admin Panel -> Manage Pages. Once we clicked Preview Page button, the script is opening the new page. This page is opening with default language. If there are several languages, the newly opened page will be still in default language. It should be fixed the way if I am editing the French content, I should see the preview in French.
