Account menu: path to default avatar is incorrect if there are several languages

September 06, 2012 00:38 - Batyr Mackenov

Status:	Resolved	Start date:	September 06, 2012
Priority:	Normal	Due date:	
Assignee:	Batyr Mackenov	% Done:	100%
Category:	Templates	Estimated time:	0.00 hour
Target version:	2.2.2		

Description

If several languages added to the script, the path to the picture for unexistent avatar is incorrect.

For example, <http://domain/en/templates/default/img/no-preview.gif>

The issue is language code is included to image HTTP request.
