

Yellow Pages Script - Bug #2411

Incorrect URL generation in Popular categories block

March 10, 2016 07:49 - Daiyrbek Artelov

Status: Resolved	Start date: March 10, 2016
Priority: Normal	Due date:
Assignee:	% Done: 100%
Category:	Estimated time: 0.00 hour
Target version: 4.2.0	

Description

Issue appear when Obtain visitor's location feature is turned on.
Here's the report from our customer:

Let us suppose we went to the following page: -

<http://demos.subrion.com/yellowpages/location/Florida/Safety-Harbor/>

Then we return to the home page. It now has "Safety Harbor" as the location.

Scroll down to the bottom of the page where you see the section "Popular categories". The problem is with the links inside this block.

For example, "Nightlife" goes to the correct page, but the link underneath it "Bars" gives the 404 error page.

It tries to send the user to: -

<http://demos.subrion.com/yellowpages/Nightlife/Bars/>

when it should send the user to

<http://demos.subrion.com/yellowpages/Florida/Safety-Harbor/Nightlife/Bars/>
