<b>Target version:</b>	4.1.0		

#### Description

**My articles** page (.../profile/articles/) doesn't work as it has incorrect SQL query:

```
User Warning: Unknown column 't4.date' in 'field list' SELECT SQL_CALC_FOUND_ROWS t1.*, t2.`title`
`category_title`, t2.`title_alias` `category_alias`, t2.`parent_id` `category_parent`, t2.`parent`
s` `category_parents`, t2.`locked` `category_locked`, t3.`username` `account_username`, IF('' != t
3.`fullname`, t3.`fullname`, t3.`username`) `account_fullname`, SUBSTRING(GROUP_CONCAT(t4.`sec_key`
ORDER BY t4.`date`) FROM -14) `transaction_id`FROM sbr405_articles t1 LEFT JOIN `sbr405_articles`
_categories` t2 ON (t1.`category_id` = t2.`id`) LEFT JOIN `sbr405_members` t3 ON (t1.`member_id` =
t3.`id`) LEFT JOIN `sbr405_payment_transactions` t4 ON (t4.`status` = 'pending' AND t4.`member_id`
= t1.`member_id` AND t4.`item` = 'articles' AND t4.`item_id` = t1.`id`) WHERE t2.`status` = 'act
ive' AND t1.`member_id` = 1 GROUP BY t1.`id` ORDER BY t1. `date_added` asc LIMIT 0, 10
```

**date** should be replaced with **date\_added** field in this query.

#### History

**#1 - December 28, 2016 04:02 - Daiyrbek Artelov**
