<b>Description</b>			
There is a new functionality in Smarty 3. assignGlobal & assign. We need to optimize the core in a way so the common global functionality use assignGlobal and local variables or objects use assign, so they are not visible in terms of global assignment.  Also please review this functionality: <a href="http://www.smarty.net/docs/en/language.variable.scopes.tpl">http://www.smarty.net/docs/en/language.variable.scopes.tpl</a>  It's possible we need to improve the default system.
