

Web Directory - Bug #442

Backend: title-alias correction is invalid

November 20, 2012 01:54 - Batyr Mackenov

Status: Resolved	Start date: November 20, 2012
Priority: High	Due date:
Assignee:	% Done: 100%
Category:	Estimated time: 0.00 hour
Target version: 2.2.2	
Description	
The script tries to remove the parent's title-alias part from the title-alias of the category before displaying the data to edit.	
Example:	
<pre>title-alias of the category: news/breaking-news/ title-alias of the parent: news/ Resulting title-alias: breaking-</pre>	
In this case script simply removes all of <i>news/</i> chunks, so the title-alias becomes invalid	

History
