

Subrion Opensource CMS - Bug #522

Messy page definition

December 19, 2012 12:20 - Vasily Bezruchkin

Status:	Resolved	Start date:	December 19, 2012
Priority:	High	Due date:	
Assignee:	Batyr Mackenov	% Done:	100%
Category:	Core	Estimated time:	0.00 hour
Target version:	2.3.1		

Description

There should be a workaround the following. Some packages have **phpCoreGetUriBeforeConstantDefine** hook that performs some validation and sets the correct processing file for the page.

```
$iaCore->requestPath = $iaView->url;  
$iaView->name('index');
```

It works fine and the system processes correct file, but its title is incorrect. Please check `$iaView->definePage` method, it fetches several pages but they all have the same title.name(

History
