Bug # 805 (Resolved): Unique key assigned to NAME column for "blocks" DB table

### Plugin name should be considered in changeset instructions

#### Description

Since here will be a paired DB index for **blocks** table, the plugin name part should be also considered when installing templates/packages.

For example, this instruction will deactivate all of the blocks named *top\_categories*:

```
<changeset>
  <block status="inactive">top_categories</block>
</changeset>
```

Instead, the script should provide a way to deactivate this block only for, say, Publishing package, as follows:

```
<changeset>
  <block status="inactive">top_categories-publishing</block>
</changeset>
```
