

Subrion Opensource CMS - Bug #807

parseUrl does not work for domains ending with www

May 06, 2013 23:33 - Vasily Bezruchkin

Status:	Resolved	Start date:	May 06, 2013
Priority:	Normal	Due date:	
Assignee:	Batyr Mackenov	% Done:	100%
Category:	Core	Estimated time:	0.00 hour
Target version:	3.0.0.alpha		

Description

Example: domainwww.com will not work, there is a redirect loop.

```
$requestPath = preg_replace('#^\/#', '', $_SERVER['REQUEST_URI']);

if (!preg_match('/www\.\/', $domain) && preg_match('/:\/\//www\.\/', $this->iaCore->get('base
url')))
{
    $domain = preg_replace('/^\/', 'www.', $domain);
    iaCore::util();
    iaUtil::go_to('http://' . $domain . IA_URL_DELIMITER . $requestPath);
}
elseif (preg_match('/www\.\/', $domain) && !preg_match('/:\/\//www\.\/', $this->iaCore->get('
baseurl')))
{
    $domain = preg_replace('/^www\.\/', '', $domain);
    iaCore::util();
    iaUtil::go_to('http://' . $domain . IA_URL_DELIMITER . $requestPath);
}
```
