Description

Hello Subrion Team,

i would like to suggest you this link: <https://developers.google.com/speed/pagespeed/insights>

You can probably use it for optimize better the lovely Subrion Cms.....

Better response time and pagespeed score, better experience for users & better times for the server that serve pages.

I have check the actual cms.subrion.com and gives 92 (out of 100) score, great work, but if you could take it at 98/100 it would be better.

Some small corrections like image optimization, js & css minify will make the score higher!

Give an out of the box cms with these features has no price for the final users !!!

Thanks for the attention!
